### Why Use MEGA™ Swatch?

One of the most difficult aspects of building or renovating a home is making decisions. What color of cabinets should I choose? What shade of hardwood flooring will look best in my home? MEGA Swatch can help you make those decisions with confidence. MEGA Swatch samples are eighty times larger than the typical 10 square inch sample found on the market today. With MEGA Swatch's 800 square inch samples, it is easy for you to see the "big picture" and visualize the product in your home.

### What is MEGA Swatch?

MEGA Swatches are poster-size paper prints of actual photographed wood. These large, high quality prints can be laid against existing flooring or cabinets to help customers decide what looks best in their home.

### Why should I start with MEGA Swatch?

MEGA Swatch is an excellent tool for you to find the perfect shade of hardwood flooring or cabinetry for your home. Our custom kits include five or ten shades of the most popular woods on the market.
